# WELCOME

On behalf of Cal Poly and the Governor's Office of Planning & Research, we welcome you to the Cal Poly campus for the second California Climate Action Planning Conference. California is a national and international leader in developing solutions for the climate change crisis. Consistent with Cal Poly's Learn by Doing approach, you have been doing the hard work of inventorying greenhouse gas emissions, conducting climate vulnerability assessments, collaborating with citizens and public officials, and developing and implementing climate action plans. Now is a moment for you to share your collective knowledge and wisdom, and learn from each other. Recently, President Obama said: "...I am convinced that no challenge poses a greater threat to our future and future generations than a changing climate...I believe there is such a thing as being too late. That shouldn't make us hopeless. It's not as if there's nothing we can do about it. We can take action." With that sentiment driving our work, we look forward to interacting with you in San Luis Obispo.

-- The CCAPC Steering Committee and Cal Poly Conference Team

**Cal Poly Vision:** Cal Poly will be the nation's premier comprehensive polytechnic university, an innovative institution that develops and inspires whole-system thinkers to serve California and to help solve global challenges.

## *College of Architecture and Environmental Design*

With nearly 1,700 students, Cal Poly's College of Architecture and Environmental Design (CAED) is the only program in the nation with all five disciplines of the built environment under one roof - Architectural Engineering, Architecture, City and Regional Planning, Construction Management, and Landscape Architecture. For over a half-century the CAED programs and our 16,000 alumni have been a positive influence on the forces that shape the planning, design and construction worlds.

## *City and Regional Planning Department*

The City and Regional Planning Department (CRP) in the College of Architecture and Environmental Design (CAED) promotes sustainable and diverse communities within cultural and human systems. CRP provides an interdisciplinary professional planning education based on a learn-by-doing approach, community outreach, and applied research to help communities aspire for better, livable places.

## *Governor's Office of Planning and Research*

The Office of Planning and Research (OPR), created by statute in 1970, is part of the Office of the Governor. OPR serves the Governor and his Cabinet as staff for long-range planning and research, and constitutes the comprehensive state planning agency.

## *Resilient Communities Research Institute*

Resilient Communities Research Institute (RCRI) in the College of Architecture & Environmental Design (CAED) is an applied research unit devoted to the application of knowledge and practice to improve the quality and safety of the built environment. RCRI utilizes professional and academic teams who focus on resiliency in the built environment and the development of actions/processes necessary to achieve safe communities utilizing comprehensive environmental planning approaches. RCRI has assisted state, local and international organizations on small and large scale projects including mitigation, recovery, and climate plans; critical infrastructure analysis; and fire resilient exurban road design.

# CONFERENCE ORGANIZERS

## **CCAPC Steering Committee**

Matt Burris, Raimi & Associates

Krista Kline, The Los Angeles Regional Collaborative for Climate Action and Sustainability

Michael McCormick, Governor's Office of Planning & Research

Kate Meis, Local Government Commission

Jillian Rich, PG&E

Tammy Seale, Michael Baker International

Honey Walters, Ascent Environmental

## **Cal Poly Conference Team**

Michael R. Boswell, Ph.D., AICP, Conference Director

Adrienne I. Greve, Ph.D., Assistant Conference Director

Nichole Garner, BSCRPI 16, Student Coordinator

Kristi Hogue, Conference Coordinator, Conference & Event Planning

Phoebe-Olivia Frisch-Gebhart, Conference Coordinator, Conference & Event Planning

## **Special thanks to:**

Jeffrey D. Armstrong, Ph.D. President, Cal Poly

Kathleen Enz Finken, Ph.D., Provost & Executive Vice President for Academic Affairs, Cal Poly

Fatma Spanton, Director, Conference & Event Planning

Hema Dandekar, Ph.D., Head, CRP

Billy Riggs, Ph.D., Assistant Professor, CRP

Melanni Wiedrich, Administrative Support Coordinator, CRP

Janet Murrieta, Administrative Support Assistant, CRP

Christine Theodoropoulos, AIA, PE, Dean, CAED

Natalie Schaefer, Assistant Dean for External Relations, CAED

Brenda Flood, Advancement Communications Specialist, CAED

Josef Kasperovich, Photographer/Media, CAED

William Siembieda, Ph.D., RCRI Director

Staff, faculty, and students of the CAED

## A legacy of protecting people, places, and communities.

- Climate Action Planning
- Comprehensive Planning
- Public Engagement & Education
- Climate Adaptation & Resiliency Planning
- Vulnerability Assessments
- Sea Level Rise Modeling
- Hazard Mitigation & Emergency Management

[MBAKERINTL.COM](http://MBAKERINTL.COM)

Together, Building  
a Better California

## Cleaner energy for a more sustainable future

The more than 22,000 men and women who work for PG&E deliver some of the nation's cleanest energy to nearly 16 million people in Northern and Central California.

We also offer a full portfolio of options to help customers save energy and money, including leading programs for energy efficiency, demand response and solar installations.

## THE ENERGY OF » ENVIRONMENT

SoCalGas® believes treating the Earth's resources with respect is critical to the health and well-being of the community. Converting organic waste into natural gas expands our renewable resources.

# THURSDAY, AUG.13

TIME	SESSION	LOCATION
8:00 - 9:00am	<b>Registration / Check-In Opens</b> (Available all day)	Spanos Theater Patio
9:00 - 10:15	<b>Opening Keynote Address</b>	PAC Pavilion
10:15 - 10:30	<b>BREAK (15 minutes)</b>	Spanos Theater Patio
10:30 - 12:00pm	<b>Plenary Panel: California 2050: Tomorrow's Future Starts Today</b>	PAC Pavilion
12:00 - 1:30	<b>LUNCH (Networking)</b>	19 Metro station
1:30 - 3:00	<b>CAP 2.0: Learning from the First Round of CAP Updates</b>	PAC Pavilion
	<b>Innovative Approaches in Outreach &amp; Education</b>	Phillips Hall
3:00 - 3:15	<b>BREAK (15 minutes)</b>	Spanos Theater Patio
3:15 - 4:45	<b>The Effect of State Policy &amp; Court Rulings on Local Climate Action Planning</b>	PAC Pavilion
	<b>Linking Public Health &amp; Climate Change</b>	Phillips Hall
4:45 - 6:00	<b>Wine &amp; Cheese Social</b>	Sage - Vista Grande
6:00 - 7:00	<b>Special Student Session on Careers in Climate Action Planning</b>	Phillips Hall
6:00 - 9:00pm	<b>SLO Farmers' Market (on-your-own)</b>	Downtown San Luis Obispo

Speaker Biographies Available on the Conference Website - <http://planning.calpoly.edu/CCAPC>

TIME	SESSION	LOCATION
8:00 - 8:30am	Coffee Social	Spanos Theater Patio
8:30 - 10:00	Local GHG Emissions Reduction Planning Beyond 2020	PAC Pavilion
	Adapting to Climate Change	Phillips Hall
10:00 - 10:15	<b>BREAK (15 minutes)</b>	Spanos Theater Patio
10:15 - 11:30	Successful Renewable Energy Actions	PAC Pavilion
	The Right Tool for the Right Job: The Past, Present, and Future of GHG Management Tools	Phillips Hall
11:30 - 1:00	<b>LUNCH (Networking)</b>	19 Metro station
1:00 - 2:15	Successful Energy & Water Efficiency Actions	PAC Pavilion
	Regional Collaboratives for Climate Action & Sustainability *	Phillips Hall
2:15 - 2:30	<b>BREAK (15 minutes)</b>	Spanos Theater Patio
2:30 - 3:45	Achieving Broader Community Goals Through Climate Action Planning	PAC Pavilion
	Understanding the Role for Agriculture & Land Conservation in Climate Action Planning	Phillips Hall
3:45 - 5:00pm	The Future of Climate Action Planning (Closing Plenary Session)	PAC Pavilion

\* Following this session will be a Special Session on exploring the potential for a Central Coast regional collaborative will be held Fri, Aug. 14 from 2:30-3:45pm in the University Union (UU), Room 216.

# PROGRAM

Session	Speakers
<b>DAY 1: Thursday, August 13</b>	
<b>Opening Keynote Address</b> Introductory remarks by: <ul style="list-style-type: none"> <li>• Kathleen Enz Finken, Provost &amp; Executive Vice President for Academic Affairs, Cal Poly SLO</li> <li>• Christine Theodoropoulos, Dean, College of Architecture &amp; Environmental Design, Cal Poly SLO</li> </ul> <i>Moderator: Dr. Michael R. Boswell, Professor, City &amp; Regional Planning, Cal Poly SLO</i>	Salud Carbajal, First District Supervisor, County of Santa Barbara  9:00 - 10:15am (PAC Pavilion)
<b>California 2050: Tomorrow's Future Starts Today</b> By 2050, California's population will have reached 50 million. Accommodating this growth while achieving the state's ambitious environmental and economic goals will require dramatic shifts in the way we plan communities over the next 35 years. At the same time our state is becoming increasingly diverse and our two largest generations— millennials and baby boomers— are turning the way we think about housing and transportation on it's head. Technology has provided an opening for major disruptions. From shared mobility and autonomous vehicles to smart grids— the future starts with our plans today. Panelists will discuss innovative strategies for a sustainable 2050 and solutions for getting there.	<ul style="list-style-type: none"> <li>• Dian Grueneich, Senior Research Scholar, Stanford University and former CPUC Commissioner</li> <li>• Mike Swords, Vice President Partnerships, Los Angeles Cleantech Incubator</li> </ul> <i>Moderator: Kate Meis, Executive Director, Local Government Commission</i>
<b>CAP 2.0: Learning from the First Round of CAP Updates</b> California saw a burst of climate action planning in the late 2000s. The young field struggled with how to do GHG emissions inventories and how to develop meaningful, effective policy. Many communities are now well into implementation of their climate action plans and some have begun their first round of plan updates. This session will look at lessons learned from these pioneer communities in the field: what works, what doesn't, and what needs to be done next.	<ul style="list-style-type: none"> <li>• Cory Downs, Conservation Specialist, City of Chula Vista</li> <li>• Bianca Siegl, Long Range and Mobility Planning Manager, City of West Hollywood</li> <li>• Alex Porteshawver, Michael Baker International and City of Benecia</li> <li>• Heather Abrams, Environmental Programs Manager, City of Menlo Park</li> <li>• Garrett Wong, Sustainability Analyst, City of Santa Monica</li> </ul> <i>Moderator: Tammy Seale, Michael Baker International</i>
<b>Innovative Approaches in Outreach &amp; Education</b> As with any planning process, community understanding and support of the topic is an essential ingredient for successful climate change and sustainability plans. Climate Action Plans that can speak to a community's values and priorities are likely to gain broader support in adoption and implementation. Panelists during this session, will provide an overview of Californian's attitudes toward climate change issues, highlight tools and resources available to engage the public, and share best practices/lessons learned from communities that have engaged stakeholders in innovative ways.	<ul style="list-style-type: none"> <li>• Lunna Lopes, Research Associate, Public Policy Institute of California</li> <li>• Ryan Wiggins, State Cap and Trade Campaign Manager, TransForm</li> <li>• Cara Pike, Executive Director, Climate Access</li> <li>• Michael DeVirgillio, City Council, City of Hermosa Beach</li> </ul> <i>Moderator: Leeanne Singleton, Sustainability + Community Planner, Raimi + Associates</i>

Session	Speakers
<b>The Effect of State Policy and Court Rulings on Local Climate Action Planning</b> New Governor's executive orders, legislation, case law and policy guidance continue to evolve how local governments are addressing climate change. This session will provide an update on selected recent cases, resources and policy guidance. The session will also discuss the new normal of climate change institutionalization as an integral component of good planning.  <i>Moderator: Michael McCormick, Senior Planner, Governor's Office of Planning &amp; Research</i>	<ul style="list-style-type: none"> <li>• Rich Walter, Principal, ICF International</li> <li>• Dylan Johnson, Associate, Brownstein Hyatt Farber Schreck, LLP</li> <li>• Brian Holland, Director of Climate Programs, ICLEI – Local Governments For Sustainability</li> <li>• Michael McCormick, Senior Planner, Governor's Office of Planning &amp; Research</li> </ul> 3:15 - 4:45pm (PAC Pavilion)
<b>Linking Public Health &amp; Climate Change</b> For good and bad, climate change and public health are inextricably linked. The public health impacts of climate change, which are already becoming apparent, will be enormous. However, the topic of public health also presents a valuable opportunity for climate action planning, providing a relevant, understandable, and rallying topic for discussing the abstract and polarizing topic of climate change. In this session, practitioners will discuss their efforts to address the public health impacts of climate change as well as how the topic of public health helps inform climate action planning.  <i>Moderator: Matt Burris, Associate Principal, Raimi + Associates</i>	<ul style="list-style-type: none"> <li>• Cyndy Comerford, Planning, Policy &amp; Analysis Manager, San Francisco Department of Public Health--Environmental Health Branch</li> <li>• Kathleen Karle, Health Promotion Division Manager, SLO County Public Health Services</li> <li>• Aleka Seville, Director of Advisory Services, Four Twenty Seven</li> <li>• Matt Burris, Associate Principal, Raimi + Associates</li> </ul> 3:15 - 4:45pm (Phillips Hall)
<b>DAY 2: Friday, August 14</b>	
<b>Local GHG Emissions Reduction Planning Beyond 2020</b> With the issuance of the Executive Order B-30-15, recent court rulings in San Diego, and the likelihood of new legislation adopting new GHG reduction targets for 2030 and 2050, the focus for state and local GHG reduction planning is shifting to the period beyond 2020. There are numerous challenges for local climate action plans (CAPs) and CEQA compliance in terms of operationalizing long term GHG reduction targets. These include determining the balance of reductions due to federal and state initiatives vs. local initiatives, managing the pace of change at the local level. The panel will share insights and practical suggestions from the 2015 AEP white paper on the post-2020 challenge, cities that are already addressing GHG reduction beyond AB-32, and BAAQMD's current effort to advance local and regional long-term GHG planning.  <i>Moderator: Rich Walter, Principal, ICF</i>	<ul style="list-style-type: none"> <li>• Rich Walter, Principal, ICF International</li> <li>• Abby Young, Principal Environmental Planner, BAAQMD</li> <li>• Nicole Vermillion, Associate Principal, Placeworks</li> </ul> 8:30 - 10:00am (PAC Pavilion)
<b>Adapting to Climate Change</b> Adaptation refers to strategies devised to address unavoidable changes projected to occur as a result of climate change. Adaptation has been the focus of planning long enough that lessons can be learned from early efforts. This panel examines the effectiveness of strategies that have been implemented and explores ways to devise adaptation approaches to address impacts on specific aspects of community function and at different spatial scales. The speakers represent a diversity of entities pursuing climate adaptation, illustrating the breadth of collective effort needed to address the challenge.  <i>Moderator: Adrienne Greve, Associate Professor of City &amp; Regional Planning, Cal Poly SLO</i>	<ul style="list-style-type: none"> <li>• Michael Germeraad, Earthquake &amp; Hazards Specialist, ABAG</li> <li>• Christopher Benjamin, Director of Corporate Sustainability, PG&amp;E</li> <li>• Ross Clark, Climate Change Action Coordinator, City of Santa Cruz</li> <li>• Curtis Ailing, Principal, Ascent Environmental, Inc.</li> </ul> 8:30 - 10:00am (Phillips Hall)

# PROGRAM

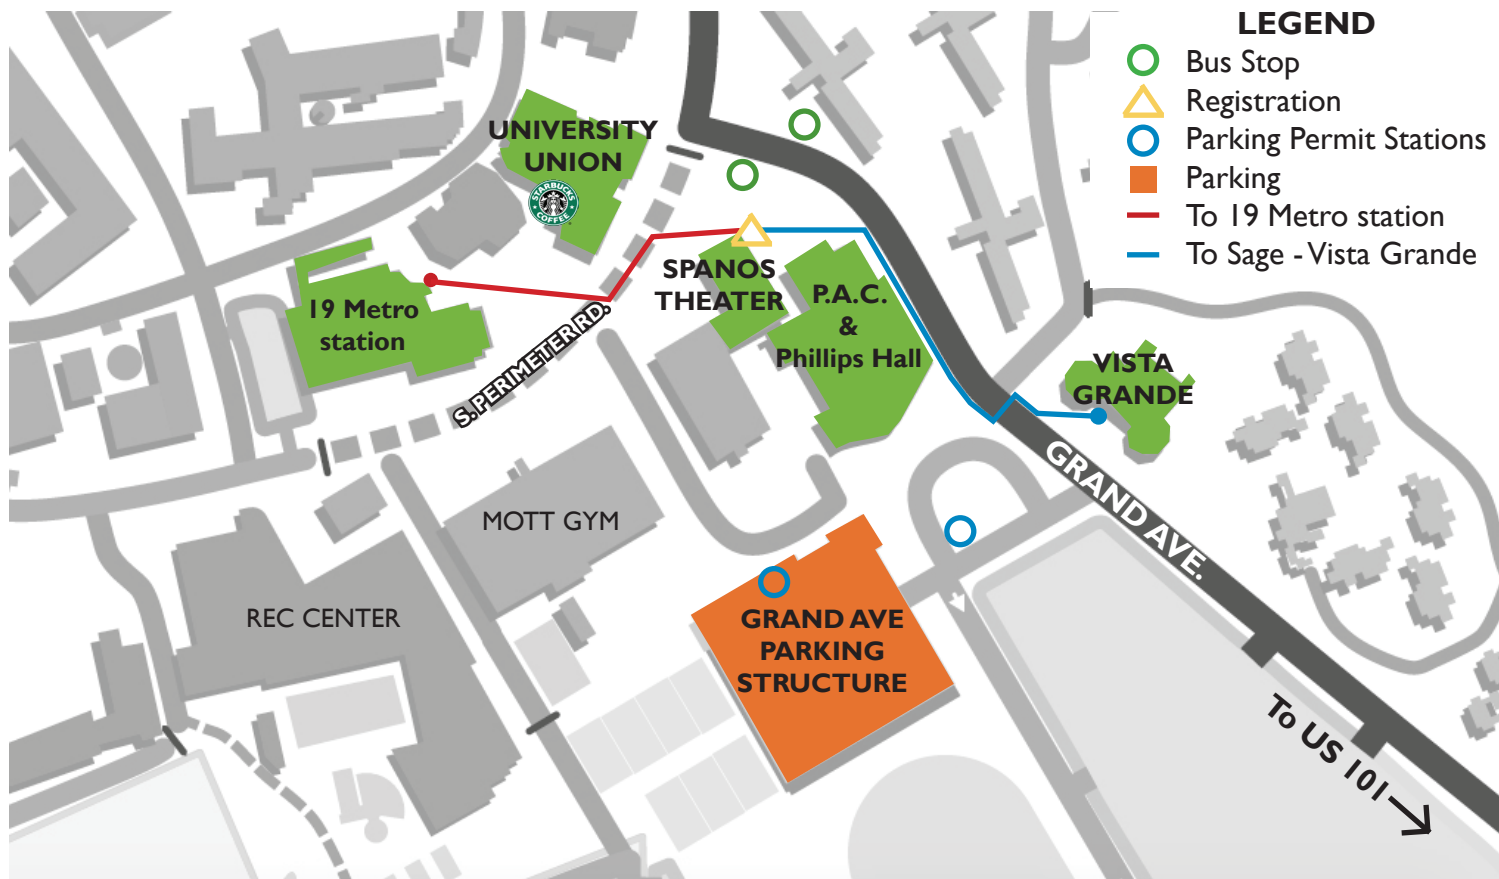

Session	Speakers
<p><b>Successful Renewable Energy Actions</b></p> <p>California communities are taking significant action to facilitate and even mandate the development of renewable and low-carbon energy—from utility scale projects that have regional and environmental implications to small scale projects that depend on business and property owners. This is a relatively new programmatic and regulatory area that is further complicated by overlapping state rules and regulations and by rapid technological change. This session examines a set of innovative programs and actions designed to advance renewable and low carbon energy.</p> <p><i>Moderator: Tammy Seale, Michael Baker International</i></p>	<ul style="list-style-type: none"> <li>• James Caruso, Senior Planner, San Luis Obispo County</li> <li>• Geoffrey Danker, Senior Policy and Planning Advisor, Southern California Gas Company</li> <li>• Betty Seto, Acting Head of Department, Sustainable Buildings and Communities, DNV GL — Energy</li> <li>• Jason Caudle, Deputy City Manager, City of Lancaster</li> </ul> <p><i>10:15 - 11:30am (PAC Pavilion)</i></p>
<p><b>The Right Tool for the Right Job: The Past, Present and Future of GHG Management Tools</b></p> <p>Greenhouse gas accounting tools specific to local governments have proliferated in recent years. In addition to calculators for inventorying emissions, we now have tools for forecasting emissions, calculating the GHG savings potential of proposed actions, and tracking actual emissions against anticipated levels. These solutions range from no-cost to high-cost, Excel-based to cloud-based, and off-the-shelf to tailor-made. This session will educate participants on how to best navigate the waters and choose the tool that is right for your organization. Please come prepared with questions, ideas, and new tools to share with the group.</p> <p><i>Moderator: Jillian Rich, Expert Program Manager, Government and Community Partnerships, Pacific Gas &amp; Electric Company</i></p>	<ul style="list-style-type: none"> <li>• Jennifer Ward, Program Manager, WRCOG</li> <li>• Susan Wright, Resource Conservation Specialist, County of San Mateo</li> <li>• Brian Holland, Director of Climate Programs, ICLEI -- Local Governments for Sustainability</li> <li>• Kadri Jugendi, Account Executive, Lucid Design Group</li> </ul> <p><i>10:15 - 11:30am (Phillips Hall)</i></p>
<p><b>Successful Energy &amp; Water Efficiency Actions</b></p> <p>The State of California has established ambitious goals for achieving energy and water efficiency. Much of the “high-hanging fruit” has been picked and communities now must develop innovative strategies. Speakers will talk about what works (and possibly, what doesn’t) and address the potential for achieving deep efficiency goals that will be needed in California’s future.</p> <p><i>Moderator: Jillian Rich, Expert Program Manager, Government and Community Partnerships, Pacific Gas &amp; Electric Company</i></p>	<ul style="list-style-type: none"> <li>• Dale Roberts, Principal Engineer, Sonoma County Water Agency</li> <li>• Allison Wood, Associate Regional Energy/Climate Planner, SANDAG</li> <li>• Jillian Rich, Expert Program Manager, Government and Community Partnerships, Pacific Gas &amp; Electric Company</li> <li>• Josh Brock, Director of Community Development, Renovate America</li> </ul> <p><i>1:00 - 2:15pm (PAC Pavilion)</i></p>
<p><b>Regional Collaboratives for Climate Action &amp; Sustainability</b></p> <p>Across California, organizations and stakeholders have come together to form regional collaboratives for the purpose of taking action on climate change and achieving sustainability and resilience. The Alliance of Regional Collaboratives for Climate Adaptation (ARCCA) is a network comprised of these existing regional collaboratives from across California. ARCCA’s members represent leading regional collaboratives that are already coordinating and supporting climate adaptation efforts in their own regions in order to enhance public health, protect natural systems, build economies, and improve quality of life. This session will introduce the why, who, and how of regional collaboratives. Following this session will be a special session for those interested in discussing the potential to form a regional collaborative on the Central Coast.</p> <p><i>Moderator: Kif Scheuer, Climate Change Program Director, Local Government Commission</i></p>	<ul style="list-style-type: none"> <li>• Krista Kline, Managing Director, The Los Angeles Regional Collaborative for Climate Action and Sustainability</li> <li>• Cody Hooven, Sustainability Manager, City of San Diego</li> <li>• Kerri Timmer, Government Affairs Director, Sierra Business Council</li> <li>• Larry Greene, Executive Director, Sacramento Metro AQMD</li> </ul> <p><i>1:00 - 2:15pm (Phillips Hall)</i></p>

Session	Speakers
<p><b>Achieving Broader Community Goals Through Climate Action Planning</b></p> <p>Co-benefits are key components of developing and implementing climate action plans. Co-benefits broaden the base of support for climate planning and they help achieve the broader vision of great communities. This session examines the power and potential of co-benefits and the important role of partnering with community organizations and stakeholders. Panelists will address issues such as transportation enhancement, economic development, and social capital building. Moreover, they will provide examples and insights on how to integrate co-benefits into climate action and how to best work with community partners.</p> <p><i>Moderator: Billy Riggs, Assistant Professor of City &amp; Regional Planning, Cal Poly SLO</i></p>	<ul style="list-style-type: none"> <li>• Alexa Washburn, Vice President of Planning, National Community Renaissance</li> <li>• Kate Meis, Executive Director, Local Government Commission</li> <li>• Chris Gray, Principal, Fehr &amp; Peers</li> <li>• Dan Rivoire, Executive Director, Bike SLO County, and Council member, City of San Luis Obispo</li> </ul> <p>2:30 - 3:45pm (PAC Pavilion)</p>
<p><b>Understanding the Role for Agriculture &amp; Land Conservation in Climate Action Planning</b></p> <p>Agriculture continues to present many challenges for climate action and deserves additional attention to both impacts and potential for GHG mitigation. Uncertainty in down-scaled regional climate change impacts makes decision-making tough for the agricultural and land conservation community—solutions must provide the maximum adaptability. Although a now vigorous field of research, the potential for agriculture and land conservation for carbon sequestration is not as well understood as it needs to be for robust program development. This session will address how to best work with the agricultural stakeholders and land conservation organizations and will look at the latest best management practices. County representatives are especially encouraged to attend.</p> <p><i>Moderator: Timothy LaSalle, Lecturer in the College of Agriculture, Food, &amp; Environmental Sciences, Cal Poly SLO</i></p>	<ul style="list-style-type: none"> <li>• Karen Gaffney, Conservation Planning Program Manager, Sonoma County Agricultural Preservation and Conservation District</li> <li>• David Morrison, Director, Planning, Building &amp; Environmental Services, Napa County</li> <li>• Libby Porzig, Senior Ecologist, Point Blue</li> </ul> <p>2:30 - 3:45pm (Phillips Hall)</p>
<p><b>The Future of Climate Action Planning</b></p> <p>To wrap up the conference this session will features leaders in the field discussing what they see as the future of climate action planning, focusing on key themes, observations, ideas and trends gleaned from the conference. The format will be a question and answer type session with ample time for questions and discussion with the audience.</p> <p><i>Moderator: Erik de Kok, Senior Planner, Ascent Environmental, Inc.</i></p>	<ul style="list-style-type: none"> <li>• Kif Scheuer, Climate Change Program Director, Local Government Commission</li> <li>• Tammy Seale, Michael Baker International</li> <li>• Michael McCormick, Senior Planner, Governor's Office of Planning &amp; Research</li> <li>• Krista Kline, Managing Director, The Los Angeles Regional Collaborative for Climate Action and Sustainability</li> </ul> <p>3:45 - 5:00pm (PAC Pavilion)</p>

# CAMPUS MAP

## INFORMATION

**VENUE:** All conference sessions will be held in the PAC Pavilion room or Phillips Hall. Both are located in the Performing Arts Center (PAC) on the Cal Poly campus. The rooms can be entered at the rear of the PAC.

### REGISTRATION and CHECK-IN:

The Registration/Check-in desk is located on the Spanos Theater Patio. The desk will be open during the following hours:

Thurs: 8:00am – 3:30pm

Fri: 8:00am - 2:30pm

**CAMPUS ARRIVAL & PARKING:** If arriving by car, enter on Grand Ave. and park in the parking garage in front of the Performing Arts Center (PAC). Parking permits are sold by attendants at the entrance to the Grand Parking Structure on Thursday Aug. 13th from 8:00am-10:00am and Friday Aug 14th from 7:00am-9:00am. The 2 day permit costs \$12.00 and the 1 day permit costs \$6.00. Please have cash ready. Participants coming later in the day need to buy a permit at a pay station. If arriving by bus, disembark at the PAC stop—free bus passes are available at the registration desk. If arriving by bicycle, there is plentiful bike parking around the PAC.

**LUNCH:** Lunch will be held at 19 Metro station on campus. It is cafeteria style with numerous options including vegetarian, vegan, gluten-free, and a salad bar. Make sure you receive your wristband when you check-in.

**CONFERENCE ATTIRE:** Business casual is the appropriate attire at all conference events.

**LOUNGE and WORKSPACE:** The University Union (UU) 2nd floor has comfortable seating and wi-fi access if you need time to work or meet with colleagues. There is a Starbucks Coffee on the 1st floor of the UU.

**WI-FI:** Free guest access is available throughout the Cal Poly campus. To log into SecureMustangWireless:

1. Connect to SecureMustangWireless.
2. Enter your Cal Poly Portal user name and password in the boxes provided.

Username: guest

Password: WiFi-guest63258 (case specific)

**TWITTER:** Tweet about the conference! #CCAPC
